Education

California State Polytechnic University Pomona

- Master of Science Degree in Pure Mathematics, May 2025
GPA: 3.57
- Bachelor of Science Degree in Pure Mathematics, May 2023
GPA: 3.4

Employment

Instructor at Cal Poly Pomona University - (909)-869-4058 - August 2024 to Present

- Led both a statistics and algebra activity course for Fall 2024 semester.
- Lectured a Trigonometry course for the Spring 2025 semester.
- Lectured Algebra and Trigonometry for Fall 2025 semester.
- Lectured a Calculus 3 course for the Spring 2026 semester.

Rio Hondo Math Academy - (562) 908-3405 - June 2025 to Present

- Lectured Integrated Math 1A and 2B.
- Currently lecturing Integrated Math 1A and 1B.

Kelly Substitutes - (800)-528-0049 - February 2024 to August 2025

- Worked as a substitute teacher for Secondary Schools.

Oxford Tutoring Center - (951)-363-5161 - March 2021 to February 2023

- Tutored in various math areas ranging from grade school to college, specifically, Trigonometry and Calculus.
- Tutored students for college entrance exams such as the SAT.

Independent Math Tutor - January 2016 to August 2024

- Tutored a high school student in Advanced Placement Calculus.
- Tutored a student from Los Angeles Trade Tech Community College in College Algebra.
- Tutored a student from LaVern University in College Algebra.
- Tutored a student from California State Polytechnic University Pomona in Calculus for Life Sciences.
- Tutored a college student from Rio Hondo Community College in Statistics.
- Tutored a student from the Los Angeles Southwest College in Statistics.

Relevant Skills

Mathematics: Trigonometry, Single and Multi-Variable Calculus, Linear Algebra, Graph Theory, Real Analysis, Complex Analysis, Topology, Number Theory, Differential Geometry, Statistics, Abstract Algebra, Measure Theory, Functional Analysis, Partial and Ordinary Differential equations, Fourier Analysis.

Coding Languages: C++, Python, MATLAB.

Miscellaneous Skills: Latex, Word, Excel, PowerPoint, Basic Accounting and Finance.

Languages: English and fluent in Spanish.

Thesis: Maximal Operators and the Fefferman-Stein Inequality on Bounded Domains

Wrote a dissertation on maximal operators and the Fefferman-Stein Inequality. The main result of the paper proves that a local version of the Fefferman-Stein Inequality is not valid on a cuspidal domain. Results in the thesis are relevant in further research related to harmonic analysis. Currently working on adding to the dissertation by doing more research on extended results.

Honors

Dean's List for semesters Spring 2021, Fall 2021, and Spring 2022 as an undergraduate.

President's List for semester Spring 2022 as an undergraduate.
